To all Bidders

R/Adress

Subject: **Official Clarification No. 1 – Small-Scale Irrigation Projects bid reference number.**
OBA-PACT-NCB-W/15/26

To all Bidders your clarification request dated January 20, 2026 has been noted. Pursuant to our bidding document ITB section 10 (Clarification of Bidding Documents) and also ITB 30(Clarification of bids), the following responses are provided and will be issued as Addendum No.1 to all pre-qualified bidders via the official portal/[notice board] to maintain competitive equity:

1. Specific Experience – Eligibility of Bridge Works:

Per our standard bid document section III (or equivalent), specific experience must demonstrate successful completion of "similar water works" within the last 5 years, explicitly including irrigation-related hydraulic structures (e.g., canals, reservoirs, pumping stations). Standalone bridges do not qualify unless they are integral to water conveyance systems (e.g., aqueduct bridges) and verifiable via Form EXP-5.2, completion certificates, and employer references. General civil bridges (e.g., road/vehicular) are excluded. Please submit only verifiable projects meeting this criterion, supported by completion certificates and detailed descriptions.

2. Submission of Technical Documents – Soft Copy via Flash Drive:

"Soft copy by flash" requires submission of the full technical proposal in electronic format (native files such as Word/Excel or searchable PDFs per ITB 23.2) on USB flash drive. Printed-then-scanned documents are permitted only as legible, high-resolution PDFs if originals are unavailable, but native editable files are preferred for evaluation efficiency. Files must be virus-free, indexed, and identical to hard copies.

Generally, according to ITB 30, No extensions to the bidding deadline are granted. Additional clarifications must be requested before February 07, 2026 according to our bidding document.
